

Marine DEF

A trustworthy supply that helps you reduce emissions

Your reliable source of Marine DEF.

Reliable supply, when you need it

Produced in our facility in New Brunswick, one of North America's largest end-to-end blending and packaging units, our **Marine DEF** is ready to be distributed where you are, when you need it.

Quality product

Our **Marine DEF** meets and exceeds industry specifications and standards, effectively increasing fuel efficiency and reducing nitrogen oxide (NOx) emissions into harmless water and gas.

Regulatory compliance

The use of **Marine DEF** effectively assists you in adhering to several regulations that require vessels to reduce their emissions, such as MARPOL.

Environmentally friendly

Marine DEF is a non-toxic, non-hazardous solution that reduces harmful emissions and helps you contribute to a cleaner and more sustainable marine ecosystem.
